

## Notification of Internet Service Provider Scheduled Maintenance

WHIRC has been notified that one of our internet service providers will be conducting maintenance on September 6<sup>th</sup>, 2023, from 0000-0600. Communicators programmed with **66.191.64.XXX** as primary will not reach WHIRC during this window, however, the secondary IPs provided by WHIRC will continue to function allowing alarm traffic to pass as normal.

IPs not impacted:

- 147.160.134.XXX
- 206.144.57.XXX
- 198.210.XX.XXX

Since secondary communication paths will continue functioning, troubles from primary communication paths will be cleared when restored.

It's important during installation and service to move to WHIRC's new 147.160.134.XXX IP addresses. Our new block ensures in the future WHIRC can reroute signals and avoid any impact from maintenance.

If you would like more information on our new block of IPs, want to start transitioning, or need more information about the upcoming scheduled maintenance, please reach out to me directly.
